SUBJECT INDEX

Absorption spectra
influence of polymerization method and temperature on, and morphology of polyaniline, 51
Alkali metal ions
electrochemical intercalation of, on C fibers, 389
Alkyl benzene sulfonate
doping of poly(alkylthiophenes), 359
Alkyl chains
synthesis of TTF derivatives substituted with two and four hydrophobic, 379
Alkyl sulfonates
as doping agent, polyanilines with covalently bonded; synthesis and properties, 369
Ammonia
and poly(pyrrole), interaction between, 163

BEDT–TTF salts
organic crystal β_d'-(BEDT–TTF)$_2$I$_3$
Raman scattering investigations of, 45
transport properties and phase transition of, 37
with square platinates(II) as counterions; [BEDT–TTF]$_4$[Pt(C$_2$O$_4$)$_2$], new organic metal, 199
Bromine intercalation compounds
effect of heat-treatment temperature of vapor-grown graphite fibers
properties of, 229
stability of, 241

Caesium
graphite–Cs intercalation compound, dissociation of H molecules by first-stage, 73
Carbon fibers
electrochemical intercalation of alkali metal ions on, 389
Carbon pitch-based fibres
study of mechanism of conduction in intercalated, 251
Carrier mobility enhancement
in semiconducting poly(3-methylthiophene) by electrochemical inclusion of Cu, 267
Charge-density-wave transition
in ZrTe$_3$, thermodynamics of; use of TaS$_3$ thermometer, 215
Charge-transport study
structural and, poly(metal tetrathiooxalates), 109
Chemical synthesis
of highly electrically conductive polypyrrole, 311
Chronopotentiometry
resistance and differential capacitance of poly(3-methylthiophene) films; comparison between cyclic voltammetry and, 127
Conducting polymer
new electrochemically-generated; poly-α-naphthalene oxide–pyrrole, 155
Conduction
in intercalated C pitch-based fibres, study of mechanism of, 251
Conductive polymers
in heavily-doped regime, theoretical studies on structural changes of conjugated, 181
Conjugated polymers
model calculations of π electron spectra of, 281
Copper
carrier mobility enhancement in semiconducting poly(3-methylthiophene) by electrochemical inclusion of, 267
Counterions
BEDT–TTF salts with square platinates(II) as; [BEDT–TTF]$_4$[Pt(C$_2$O$_4$)$_2$], new organic metal, 199
Current density
effect of, and film thickness; electrochemical polymerization of 3-dodecylthiophene, 29
Cyclic voltammetry
resistance and differential capacitance of poly(3-methylthiophene) films; comparison between, and chronopotentiometry, 127

© Elsevier Sequoia/Printed in The Netherlands

Density
of electronic states in periodic and disordered chains of segmented polyacetylene, 9
Differential capacitance
resistance and, of poly(3-methylthiophene) films; comparison between cyclic voltammetry and chronopotentiometry, 127
Differential thermal analysis
of intercalation reactions in molten salts, 319
Diffusional and structural effects
in oriented Durham polyacetylene; electrochemical study, 141
p-Dimethylamino-*p'*-bromoazobenzene
TCNQ complexes with donors disposed to form liquid-crystal phase; DABA•TCNQ, 225
Dissociation
of H molecules by first-stage graphite–Cs intercalation compound, 73
3-Dodecylthiophene
electrochemical polymerization of; effect of current density and film thickness, 29
Durham polyacetylene
diffusional and structural effects in oriented; electrochemical study, 141

Electrical and photovoltaic properties
of solution-doped polyacetylene and its stability, 191
Electrochemical immobilization
one-step, of Keggin-type heteropolyanions in poly(3-methylthiophene) film at electrode surface; electrochemical and electrocatalytic properties, 327
Electrochemical inclusion
of Cu, carrier mobility enhancement in semiconducting poly(3-methylthiophene) by, 267
Electrochemical intercalation
of alkali metal ions on C fibers, 389
Electrochemical polymerization
of 3-dodecylthiophene; effect of current density and film thickness, 29
Electrochemical studies
diffusional and structural effects in oriented Durham polyacetylene, 141
of poly(phenylene vinylene), magnetic resonance and, 147
Electrode surface
one-step electrochemical immobilization of Keggin-type heteropolyanions in poly(3-methylthiophene) film at; electrochemical and electrocatalytic properties, 327
Electron spectra
model calculations of π, of conjugated polymers, 281
Electronic states
density of, in periodic and disordered chains of segmented polyacetylene, 9
Electronic structures
of polymetacyclophanes, 23
Excited states
of polyyne chains; polarons and polarexcitons, 61

Film thickness
effect of current density and; electrochemical polymerization of 3-dodecylthiophene, 29

Graphite
–Cs intercalation compound, dissociation of H molecules by first-stage, 73
theoretical approaches to synthetic reaction of one-dimensional graphite, 1
Graphite fibers
effect of heat-treatment temperature of vapor-grown
properties of Br intercalation compounds, 229
stability of Br intercalation compounds, 241

Heat-treatment temperature
effect of, of vapor-grown graphite fibers
properties of Br intercalation compounds, 229
stability of Br intercalation compounds, 241
Heteropolyanions
one-step electrochemical immobilization of Keggin-type, in poly(3-methylthiophene) film at electrode surface; electrochemical and electrocatalytic properties, 327

Hydrogen molecules
dissociation of, by first-stage graphite–Cs intercalation compound, 73

Intercalation compound
graphite–Cs, dissociation of H molecules by first-stage, 73
Intercalation reactions
in molten salts, differential thermal analysis of, 319

Langmuir–Blodgett films
alternate-layer, of long-chain TCNQ and TTF derivatives, 275

Magnetic resonance
and electrochemical studies of poly(phenylene vinylene), 147
Model calculations
of π electron spectra of conjugated polymers, 281
Molten salts
differential thermal analysis of intercalation reactions in, 319
Morphology
of polyaniline, influence of polymerization method and temperature on absorption spectra and, 51

Organic crystal
β_d'-(BEDT–TTF)$_2$I$_3$
Raman scattering investigations of, 45
transport properties and phase transition of, 37
Organic metal
new, [BEDT–TTF]$_4$[Pt(C$_2$O$_4$)$_2$]; BEDT–TTF salts with square platinates(II) as counterions, 199
Oxidation levels
polythiophene puzzle; electrochemical and spectroelectrochemical evidence for two, 347

Phase transition
of organic crystal β_d'-(BEDT–TTF)$_2$I$_3$, transport properties and, 37
Photovoltaic properties
of solution-doped polyacetylene and its stability, electrical and, 191
Platinum
BEDT–TTF salts with square platinates(II) as counterions; [BEDT–TTF]$_4$[Pt(C$_2$O$_4$)$_2$], new organic metal, 199

Polarization properties
of Raman spectra of oriented *cis*- and *trans*-polyacetylene, 335
Polarons and polarexcitons
excited states of polyyne chains, 61
Polyacetylene
diffusional and structural effects in oriented Durham; electrochemical study, 141
electrical and photovoltaic properties of solution-doped, and its stability, 191
periodic and disordered chains of segmented, density of electronic states in, 9
polarization properties of Raman spectra of oriented *cis*- and *trans*-, 335
Poly(alkylthiophenes)
alkyl benzene sulfonate doping of, 359
Polyaniline(s)
with covalently bonded alkyl sulfonates as doping agent; synthesis and properties, 369
influence of polymerization method and temperature on absorption spectra and morphology of, 51
preparation of, doped in mixed protonic acids; their characterization by X-ray photoelectron spectroscopy and thermogravimetry, 95
Poly(dihydroisothianaphthene) films
conversion to conductive poly(isothianaphthene), 395
Poly(isothianaphthene)
conversion of poly(dihydroisothianaphthene) films to conductive, 395
Polymerization method
influence of, and temperature on absorption spectra and morphology of polyaniline, 51
Polymetacyclophanes
electronic structures of, 23
Poly(metal tetrathiooxalates)
structural and charge-transport study, 109
Poly(3-methylthiophene)
carrier mobility enhancement in semiconducting, by electrochemical inclusion of Cu, 267
Poly(3-methylthiophene) film(s)
one-step electrochemical immobilization of Keggin-type heteropoly-

anions in, at electrode surface; electrochemical and electrocatalytic properties, 327
resistance and differential capacitance of; comparison between cyclic voltammetry and chronopotentiometry, 127
Poly-α-naphthalene oxide
–pyrrole; new electrochemically-generated conducting polymer, 155
Poly(phenylene vinylene)
magnetic resonance and electrochemical studies of, 147
Polypyridazine
–acceptor complexes, XPS studies of some chemically-synthesized, 79
Poly(pyrrole)
chemical synthesis of highly electrically conductive, 311
interaction between ammonia and, 163
Polythiophene puzzle
electrochemical and spectroelectrochemical evidence for two oxidation levels, 347
Polyyne chains
excited states of, polarons and polarexcitons, 61
Protonic acids
preparation of polyanilines doped in mixed; their characterization by X-ray photoelectron spectroscopy and thermogravimetry, 95
Pyrrole
poly-α-naphthalene oxide–; new electrochemically-generated conducting polymer, 155

Raman scattering investigations
of organic crystal β_d'-(BEDT–TTF)$_2$I$_3$, 45
Raman spectra
of oriented *cis*- and *trans*-polyacetylene, polarization properties of, 335
Resistance
and differential capacitance of poly(3-methylthiophene) films; comparison between cyclic voltammetry and chronopotentiometry, 127

Stability
of Br intercalation compounds; effect of heat-treatment of vapor-grown graphite fibers, 229
electrical and photovoltaic properties of solution-doped polyacetylene and its, 191
Structural changes
theoretical studies on, of conjugated conductive polymers in heavily-doped regime, 181
Synthetic reaction
of one-dimensional graphite, theoretical approaches to, 1

Tantalum
thermodynamics of charge-density-wave transition in $ZrTe_3$; use of TaS_3 thermometer, 215
TCNQ
and TTF derivatives, alternate-layer Langmuir–Blodgett films of long-chain, 275
TCNQ complexes
with donors disposed to form liquid-crystal phase; TCNQ-(*p*-dimethylamino-*p'*-bromoazobenzene), DABA*TCNQ, 225
Tellurium
thermodynamics of charge-density-wave transition in $ZrTe_3$; use of TaS_3 thermometer, 215
Temperature
influence of polymerization and, on absorption spectra and morphology of polyaniline, 51
Theoretical approaches
to synthetic reaction of one-dimensional graphite, 1
Theoretical studies
on structural changes of conjugated conductive polymers in heavily-doped regime, 181
Thermodynamics
of charge-density-wave transition in $ZrTe_3$; use of TaS_3 thermometer, 215
Thermogravimetry
preparation of polyanilines doped in mixed protonic acids; their characterization by X-ray photoelectron spectroscopy and, 95
Transport properties
and phase transition of organic crystal β_d'-(BEDT–TTF)$_2$I$_3$, 37
TTF derivatives
long-chain TCNQ and, alternate-layer Langmuir–Blodgett films of, 275

substituted with two and four hydrophobic alkyl chains, synthesis of, 379
TTF salts
BEDT– with square platinates(II) as counterions; [BEDT–TTF]$_4$[Pt(C$_2$O$_4$)$_2$], new organic metal, 199

XPS studies
of some chemically-synthesized polypyridazine–acceptor complexes, 79

X-ray photoelectron spectroscopy
preparation of polyanilines doped in mixed protonic acids; their characterization by, and thermogravimetry, 95

Zirconium
thermodynamics of charge-density-wave transition in ZrTe$_3$; use of TaS$_3$ thermometer, 215
